Learning the R.O.P.E.S.

Supporting Children with Executive Functioning Challenges

Presented by: Patty Schetter, M.A., BCBA, Autism & Behavior Training Associates

Date: April 9, 2016
Time: 9:00 AM—12:00 PM
Intended Audience: Parents and Care–Providers of children with executive function deficits
Objective: In this workshop parents will learn about the common challenges that are associated with executive dysfunction and several strategies that can be used to support issues such as task completion, planning, organization skills, self evaluation and goal setting.
Location: H. Glenn Richardson Educational Complex, 1069 Meadowlark Drive, Fairfield, 94533
Cost: Free (If you wish to purchase the Learning the R.O.P.E.S. book it will be available to purchase for $40.00)
A Light Breakfast and Childcare will be provided—Please send an email to SELPA-Registration@solanocoe.net with the names and ages of children needing childcare.

This workshop is appropriate for parents and care-providers of school aged children (Elementary, Middle and High School) who struggle with organizational skills. Executive dysfunction is commonly seen in children with ADHD, Autism and other learning challenges, however, strategies shared in this workshop can be used with any child.
Patty Schetter is a board certified behavior analyst with over 20 years of experiences supporting students with learning and behavioral challenges. In this workshop she will share many practical strategies from her book "Learning the ROPES For Improved Executive Functioning"
